MSc Sustainability Transformations

BECOME A CHANGE-MAKER FOR A SUSTAINABLE FUTURE

The MSc Sustainability Transformations aims to provide first-class training in sustainability. The programme is designed to endow students with a 360° strategic vision of the economic, social and environmental challenges facing the world today.

Programme highlights

Gain a comprehensive view of sustainable transformations

- ♦ Master sustainability strategies through courses in Climate, Business Decarbonisation, Corporate Strategy & Transitions Management, and CSR & ESG Strategy. Learn to create and implement a sustainable change plan within an organisation, engaging stakeholders along the way.
- ♦ Incorporate new, forward-thinking and systemic approaches to meeting Social & Environmental Transition challenges with courses on New Business Models, Circular Economy & New Green Businesses, for example.

Immersive learning experiences to get to the heart of sustainability issues

- ♦ Kick-off your learning experience with an intensive two-day seminar at the **Campus de la Transition**, a ground-breaking academic laboratory space.
- ♦ Explore the impact of digital media and tools on the environment and discover key solutions to build a more sustainable digital sector with **The Digital Collage** workshop.
- ♦ Examine our society's existing linear economic model and its impacts and brainstorm ideas to make the shift towards a greener economy during the **Circular Economy Collage workshop**.

Partnerships & transversal business cases

- ♦ **Transversal business case with EY:** How are companies coping with the new European Corporate Sustainability directives (CSRD in particular) requiring companies of all sizes to publish regular extra-financial reports?
- ♦ **Business case in partnership with BMW:** The car industry is experiencing a vast and sweeping revolution today, faced with the EU ban of internal combustion engines (ICE) in 2035 and the rapidly changing landscape of digital and AI. How should BMW tackle all these changes?

Strengthen your resume with two key industry certifications

- ♦ Train for and obtain **The Assessment of Sustainability Knowledge** (TASK by Sulitest), the first international certificate of sustainability knowledge.
- ♦ Obtain the certification to lead the “**2Tonnes**” climate awareness workshop, an educational experiment that uses data models to simulate low-carbon transition scenarios in a quantified way.

Academic excellence in sustainability

- ♦ Learn from a diverse faculty composed of researchers and practitioners who bring complementary perspectives on current sustainability issues, with publications in top-tier journals including the Journal of Cleaner Production, the Journal of Business Ethics and Ecological Economics.
- ♦ **NEOMA is the only business school** to support a multi-disciplinary team of researchers focused exclusively on the bioeconomy. Within its Chair of Bioeconomy & Sustainable Development, NEOMA is paving the way with leading research on economy management of the green transition.

Take action from School:

- ♦ With NEOMACT, a new initiative in line with the 17 United Nations SDGs, students are empowered to become positive actors for change from their arrival. Students and staff can get involved via high-impact projects and workshops centred on decarbonisation issues, awards for student-led initiatives, and more.
- ♦ One third of NEOMA's student organisations are dedicated to sustainability and solidarity, and each includes a Social & Environmental Transition Representative role. Take responsibility in a creative environment: join a student organisation and boost your professional skills in a collaborative setting.

Valéry MICHAUX,
Head of Programme,
is a professor of Strategy, Strategic Foresight & Economic Intelligence. She is passionate about multidimensional changes, whether within organisations, across entire industries, or transforming entire regions.

Ana COLOVIC,
PhD, HDR, Co-Head of Programme,
is a Full Professor of Strategy & Entrepreneurship at NEOMA Business School. Her research interests include business models, industrial clusters, inter-firm networks, entrepreneurial innovation, internationalisation and innovation policy.

1 month of graduation.

Get inspired by our students' stories

As an international student, it's a big privilege to study in the same place where the Paris Climate Accords were drafted and signed, because as sustainable professionals our aim and future is pointed towards the Paris Accords and fulfilling its initiatives.

I'm interested in learning about European law and the impact that climate change has on Europe as a continent, especially as Europe is a leader in sustainability legislation. Coming from an engineering background, management is new to me, so I'm looking forward to absorbing as much technical knowledge as I can as well.

Franklyn PAUL
CSR Analyst,
Kingspan Group
Class of 2025

I'm very interested in Corporate Social Responsibility and I want to work in large international companies to enact significant change and really have an impact.

I think this Master of Science programme is really interesting for me to learn not only about climate change, but also about planetary boundaries, social and societal issues, norms, and all the changes that are coming. This Master is undoubtedly pertinent for both my professional and personal life.

Dany LEROUX
Sustainability Engagement &
Partnerships Project Officer Intern,
Moët Hennesy (LVMH)
Class of 2025

Admissions requirements

1-YEAR MSc:

- 4-year bachelor's degree or 3-year bachelor's degree with minimum 1 year of professional experience
 - Proof of English language proficiency is required during the application process (TOEIC, TOEFL iBT, IELTS, Cambridge, Duolingo)*
- *Contact the Admissions team to learn more about required scores.

2-YEAR MSc:

Candidates with a 3-year bachelor's degree complete their MSc in two years, starting with the International Pre-Master programme in the first year and continuing with the MSc curriculum in the second.

Admissions process

- Complete the online application: apply.neoma-bs.fr
- Provide scanned copies of all original documents in English or French (CV, motivation letter, transcripts, etc.)
- Candidates who meet the admissions requirements will be asked to complete an online interview
- Admissions decisions are communicated by email within two weeks of the interview
- Application fee: €100

Admissions calendar

Applications are accepted on a rolling basis, from September with a final deadline for submissions in mid-July.

However, given the limited number of places, candidates are advised to apply as early as possible.
